

1 RSAA Skillshare 2026 05 Impactful Collaborating and Networking

1.1 My collaboration ecosystem

1.1.1 Inside RSAA (but outside your supervisory team)

Person:

Why them / possible overlap:

First interaction:

1.1.2 In Australia (but outside your current closest collaborators)

Person / group:

Why them / possible overlap:

First interaction:

1.1.3 Future postdoc environment

Institute / person:

Why interesting?

Possible connection:

1.2 What can I contribute?

Examples: coding, simulations, observations, data analysis, survey expertise, organisation, communication, persistence, ...

My strengths / contributions:

1.3 My scientific identity

People may eventually associate me with a question, method, dataset, capability, or style of thinking.

What do I want to become known for?

One science question/problem I genuinely care about:

1.4 Audience-role communication exercise

Choice your audience: Expert astronomer, Non-expert astronomer, Non-astronomers, ...

What does this audience care about?

My short (<1min) explanation

1.5 My next conference playbook

Next conference / workshop / meeting:

Three people I could talk to:

One science question I genuinely want to discuss:

One person I could ask “What needs to be done?”:

One way I could introduce myself:

One possible follow-up afterwards:

One person I should reconnect or regularly catch up with:

1.6 One thing outside my comfort zone

Examples: ask a seminar question, reconnect with someone, organise coffee, discuss collaboration ideas, send a follow-up email, ...

One networking or collaboration step I want to try next:
